# **DETAILED ACTION**

#### Status of Claims

1. Claims 1-11 are pending.

Claims 1-11 are rejected.

#### **Priority**

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

# Information Disclosure Statement

3. The information disclosure statement filed February 28, 2002 has been considered.

# Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The specification does not provide support for a compound (I) having a molecular weight between 200 and 299 as claimed in claim 2 (see specification page 11, line 17). The specification does not provide support for line 2 of claim 6 (see specification page 25, line 7).

#### Claim Rejections - 35 USC § 112

5. Claims 6-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 10/084,506 Page 3

Art Unit: 1621

Claim 6 is indefinite because the substituent EH1 is not defined in the claim.

Claims 7 and 8 are indefinite because they depend from an indefinite claim. <u>Ex</u> parte Cordova, 10 U.S.P.Q.2d 1949, 1952 (P.T.O. Bd. App. 1989).

Claim 9 is indefinite because it appears to be incomplete (see line 4).

#### Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Oharu et al. (JP 02311438). Oharu et al. teaches the claimed compound CCIF2CcIFO(CF2)4COF (see CAPLUS abstract and compound (d) on page 236 of Japanese document).

### Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.

Application/Control Number: 10/084,506

Art Unit: 1621

- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 10. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 11. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moore (US 5,466,877) alone or in view of Bierschenk et al. (US 5,093,432).

Moore teaches that fluorination of hydrocarbon carboxylic acid esters into the corresponding perfluorinated esters, which are then converted to the more useful acyl fluoride (entire document, in particular column 1, lines 40-67).

Moore differs from the instant claims in that Moore does not specifically teach preparing compounds (III) and (IV) from compounds (I) and (II). However Moore suggests that compounds (III) and (IV) can be prepared from compounds (I) and (II) because Moore teaches that due to the mild conditions employed in the method, chlorinated hydrocarbons can be converted to polyfluorinated materials with essentially all of the chlorine being retained in original positions (see column 2, lines 28-33 of Bierschenk et al. (US 5,093,432), which is incorporated by reference into Moore). Thus, one having ordinary skill in the art at the time the invention was made would have found the instant invention obvious over the teachings of Moore.
